

10kV busbar switching operation

Overview

Switching the panel is done via electrical operation. The operation panel is located in the low voltage compartment of the panel. This prevents accidents caused by. Medium-voltage switchgear 8DA/B is indoor, factory-assembled, type-tested, single-pole metal-enclosed, gas-insulated switchgear, for single-busbar and double-busbar applications, as well as for traction power supply systems. A busbar is a metal bar, usually made of copper or aluminum, that carries electricity inside switchgear. It connects. In our power plant 10kv busbar pt feeder has interlock with incoming cb of busbar. is it necessary?
