

# **800mm Deep Fiber Optic Tube for Industrial Park with Label**

## 800mm Deep Fiber Optic Tube for Industrial Park with Label

The portfolio includes armored, non-armored and dielectric fiber optic cable designs, available with dry or gel-filled tubes. These cables exhibit unmatched stability and optical excellence.

Optical cables for industrial applications. Available with multimode fibers, HCS (200/230) fibers, and plastic optical fibers (POF).

Our program meets diverse fiber optic sourcing and fulfillment needs with over 200 SKUs of unique fiber optic cable types from leading manufacturers, including Corning glass options on master reels.

Fiber-MART

Armored, burial, and ruggedized designs are suited to a host of industrial environments. For each product design, items for OM1, OM3, OM4, OM5, and OS2 (Singlemode) items have been developed.

We specialize in providing leading edge solutions and manufacturing technology products such as industrial networking cables, illumination fibers, medical assemblies and optical sensors.

Our optical fiber and probe assemblies are clearly and cleanly labeled in three ways so that you can always determine the part number, the fiber core diameter, and its wavelength range of best efficiency.

Siemon fiber optic cables are offered in Tube (OSP) in cables - are International ideal for campus, building-to-building interconnections, lashed aerial, duct or XGLO underground and LightSystem ...

Outdoor Structured fiber optic cabling. AFL offers armored loose tube, heavy duty, gel-free, double jacket, single armor, non-armored, rodent resistant, MicroCore, OSP, FTTx and Uniflex optical fiber ...

Outdoor fiber optic cables can be strung along telephone poles (aerial), installed inside underground ducts, or buried directly below ground. Cable designs vary based on the installation application.
