

A 500 Mbps fiber optic cable and a gigabit router are sufficient

A 500 Mbps fiber optic cable and a gigabit router are sufficient

Blazing internet speeds that hit 500 Mbps and beyond enter rarified "gigabit" territory. While both offer hyper-fast downloading beyond typical plans, 1 Gig (Gbps) costs extra.

Internet service providers generally offer several plans, each promising a different range of speeds. The pricing can be confusing, but in general the faster the connection, the more you pay. ...

Is there a big difference between 500 Mbps and 1 Gbps? Compare these speeds to find the best option for your internet needs.

This guide breaks down 500 Mbps, 1 Gig, and 2 Gig (2,000 Mbps) to help you understand what each speed can do for your home, from streaming and gaming to smart home devices and ...

Cable routers often lack the processing power and WiFi standards needed to fully utilize fiber's capabilities. For best results, upgrade to a router specifically designed for high-speed fiber ...

From 500 Mbps for basic browsing to 5 Gbps for the highest demands, fiber internet is the key to unlocking a seamless, high-speed online experience. Looking to upgrade? Consider ...

In this internet-dependent day and age, 500 Mbps internet service is a sweet spot that offers enough speed for just about all needs without being outlandishly expensive.

Gigabit cable internet has enough upload speed for a stable video call, but a Gigabit fiber connection runs at gigabit speeds both ways. This makes it ideal for video chat like Zoom and Skype, ...

500 Mbps vs. 1 Gig: which is better for you? Before you shop for an internet plan, check this handy guide to see which speed is best for you.

Is 500 Mbps fast enough? Find out what speed your home really needs and how to choose the best internet plan for your household.
