

Are cable trays considered support frames

Overview

A cable tray system forms a structural framework used to support electrical cables, differentiating it from traditional conduit piping that fully encloses wires. Cable tray support structures form the basis of the cable tray system. The cable tray is 3' wide and 4" deep and weighs 3. 1 Codes and Standards The design of cable trays and their supports conform to. According to DIN EN 61537, a cable support system is used to support and house cables.

Are cable trays considered support frames

Cable trays support cable across open spans in the same manner that roadway bridges support traffic. Cable trays are not raceways, and are treated as a structural component of a facility's electrical system.

A cable tray system forms a structural framework used to support electrical cables, differentiating it from traditional conduit piping that fully encloses wires.
