

Bus access to distribution box

DATA ADJUSTABLE, EASY TO USE

SET INCREASE DECREASE POWER SWITCH

Overview

Busway is defined by the National Electrical Manufacturers Association (NEMA) as a prefabricated electrical distribution system consisting of bus bars in a protective enclosure, including straight lengths, fittings, devices, and accessories. For decades, Starline has been the leader in flexible, scalable, and reliable power distribution. Starline Track Busway is an open channel, overhead power distribution system that allows you to move and rearrange power when and where you need it, eliminating the need for electricians and minimizing. Using busway in place of cable and conduit to distribute electrical power can help building owners save all three commodities in significant amounts. For additional. A distribution system is a system that distributes electrical power throughout a building.

Bus access to distribution box

NEMA defines a busway as a prefabricated electrical distribution system consisting of bus bars in a protective enclosure, including straight lengths, fittings, devices and accessories.
