

CS Connector Standard

CS Connector Standard

This specification defines the fiber optic connector interface, a single position plug connector set of plug/adaptor configuration that is characterized by two 1.25 mm nominal diameter ferrules.

The CS Consortium is an open organization to third parties who wish to participate as members to enable CS high density connectivity solutions. The consortium is made up of founding, standard, and ...

The CS® connector size is reduced by 40% compared to the standard LC duplex connector. The CS® connector features a push-pull tab, making it easier to handle in high-density environments. The ...

Panduit has launched the CS® Connector, a high-density fiber connector solution that optimizes the data center for next generation applications. Its compact size enables breakout mode options and ...

The Original CS® Standard connector design offers exceptional performance at an economical price. The CS is a Very Small Form Factor (VSFF) connector and is ideal for space-saving solutions. The ...

CS connectors are engineered for compatible fit, form, and function with widely adopted market standards, enabling seamless integration into existing platforms while offering flexibility across ...

As the transition to 400Gb backbones occur, standards bodies created the new CS connector specification which increases the number of duplex optical links by approximately 40% per rack unit ...

The Original CS® Standard connector design offers exceptional performance at an economical price. The CS is a Very Small Form Factor (VSFF) connector and is ideal for space-saving solutions. The ...

CS connectors are a Very Small Form Factor (VSFF) solution designed for high-density patching in data centers. Compared with traditional LC duplex interfaces, CS helps increase port density, leaving ...
