Metal vs. plastic- Plastic boxes cost the least but can only be used with non-metallic cable. Metal boxes are more durable and more impact- and temperature-resistant. 2. Accessibility- Labor costs increase for installations in tight locations, such as narrow attic space. Junction box installation costs \$100 to \$300 for parts and labor, depending on the installation location, accessibility, and the electrical box size, material, and indoor or outdoor rating. Plastic junction boxes for indoor wiring cost 50% to 80% less than metal boxes but aren't as durable. 1. Spliced wires must be housed in a junction box, according to the National Electrical Code. A junction box is a plastic or metal electrical box used to house wire splices. A junction box protects the wire connections from the elements, allows circuits to safely split and branch in other directions, and provides electricians with easy access for repairs or additions. Junction boxes add safety by preventing electrical shock and
