

## Change gray cable trays to white

### Overview

The most reliable approach is to set the Service Type at the type level, using predefined conduit and tray types in your template. No forgotten. White cable tray systems provide a clean, organized, and highly functional solution for managing electrical and data cabling in a wide range of environments. Known for their bright, polished appearance, white cable trays are particularly well-suited for applications where aesthetics, visibility. Is there a way that I can change the colors of 3 different cable trays to 3 different colors that will still display when I export to navisworks?

06-30-2022 07:11 AM Hi. The filter setting is the only option on Revit. Available in bottom only and bottom with sides, each 200' polypropylene roll can be easily cut to length to fit any installation. It's a project that needs a plan, the right tools, and a bit of know-how. I'll share what I've learned from years of doing this, so you can tackle your next. us-trations without notice. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent.

## Change gray cable trays to white
