

Cloud Interconnect Data Center Costs

Overview

The current boom in AI has triggered a massive wave of data center construction, but the sheer scale of the financial commitment required is often difficult to grasp. This article deconstructs the economic fundamentals of the modern data center, providing a clear and. Data transfer from your Virtual Private Cloud (VPC) networks through your Cloud Interconnect connections is discounted compared to general network pricing for Google Cloud. There are no per-gigabyte data transfer charges. Billing starts when you create an interconnect and stops when you delete it. Interconnect hour. Independent research from ACG Research compared the three-year Total Cost of Ownership (TCO) for Carrier Ethernet, wavelength services, and dark fiber across metro (50 km), regional (200 km), and long-haul (500 km) deployments. At 400G. IDC predicts that data generation will grow explosively, at a compound annual growth rate (CAGR) of 40.
