

## Customization Process for 6-Core Connector Box

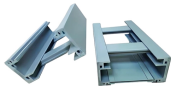

## Customization Process for 6-Core Connector Box

Box build assembly is the integration of PCBAs, cables, connectors, mechanical parts, labels, firmware, and final test into a finished or semi-finished electronic unit.

The Connector SDK allows you to develop custom connectors using Java code. You can focus on the logic of the connector, test it locally, and reuse its runtime logic in multiple runtime environments.

Connector Terminal Production Process From your CAD drawing to packaged parts, Richconn follows a structured DFM-driven production process with inspection gates at every stage.

This consists of a 2-row, 40-pin, 2.54 mm pitch connector which connects to most interfaces available on Raspberry Pi devices: UART, I C, GPIOs, ADC, PWMs, ...

Our team of experts have a proven track record of creating customized connectors for even the most demanding applications, ranging from medical to military and nuclear.

We also offer optional services, including antenna design/selection guidance, cellular integration support, certification assistance, or custom design services, to get you to market faster and smarter.

Read on to see the components you should consider when constructing your custom box build assembly and why NAI is the best choice when it comes to box build manufacturing.

Get high-precision insertion tools and extraction tools that are designed for quality wire processing that is to insert or extract terminals from connector housings without causing damage.

Customized Box Build Assembly Solutions and Superior Customer Service. As leading box build assembly manufacturers, our vertically integrated box build solutions help customers streamline their ...

11/65/EU GR-1221-Core GR-1209 Corning OEM offers a broad range of Fiber Array Units (FAUs) for long-haul, metro networks.

Its patent-pending Digi SMTplus™ surface mount form factor allows you to choose simplified design integration leveraging proven and easy-to-use edge-castellated ...

Our box build assembly process streamlines your production while ensuring the highest quality standards for aerospace, medical, industrial, and telecom applications. Meticulous integration of all ...

With dedicated Application Specific Product engineers and technicians, we are open to custom connectors and cables spanning every product category we offer, which includes both simple ...
