

# DIY Electrical Distribution Box Canopy

## Overview

In this video, I will walk you through how to build an outdoor waterproof electrical box. Stop popping your GFI or GFCI and keep it dry. This device safely takes power from a single source, such as a generator or temporary utility service, and divides it into. Let's be crystal clear: working with electricity is extremely dangerous and can result in severe injury, fire, or death. This post is a case study of a personal project I completed based on South Korean standards (single-phase 220V / 60Hz) and is NOT a universal tutorial. Do not attempt this unless. I DONT KNOW ABOUT RULES AND REGULATIONS IN YOUR PROVINCE/TERRITORY/STATE BUT HERE IN PEI, ALL LIGHTS OTHER THAN STOCK HEADLIGHTS/FOGS ARE ILLEGAL TO USE ON THE ROAD. OFF ROAD USE ONLY! This box did not cost me very much if anything at all, being as I had almost everything on hand. Durable IP67-rated design resists dust, water, and impact. Perfect for hobbyists and professionals alike. Disclaimer: This content is provided.

## DIY Electrical Distribution Box Canopy

For starters, I built a rack for my truck to throw some "off road" lights on. I wanted a box to control these and some reverse lights. I also got an old remote starter from my dad that happened to have some ...
