

Explosion-proof positive pressure type positive pressure switchboard distribution box

Overview

Explosion-proof Pressurized Enclosure BPG51 safely controls and distributes electrical power in hazardous areas, preventing ignition risks effectively. Positive pressure explosion protection is a specialized explosion-proof design approach. Its primary principle involves isolating combustible substances from ignition sources to achieve explosion prevention. Specifically, the control system within the explosion-proof control cabinet works in. The shell is made of high-quality carbon steel or stainless steel welded into shape, and the surface is treated with high-voltage electrostatic spraying, which is corrosion-resistant, anti-static, firm and reliable; 2.

Explosion-proof positive pressure type positive pressure switchboard

Explosion-proof Pressurized Enclosure BPG51 safely controls and distributes electrical power in hazardous areas, preventing ignition risks effectively.

BXP52 series positive pressure type explosion-proof power distribution cabinet (IIB, IIC, DIPA20)

Kaiwei products have passed ATEX, CCC, CE, INGRESS PROTECTION, factory explosion-proof certification and ISO9001-2000 international quality system certification. Product quality has been ...

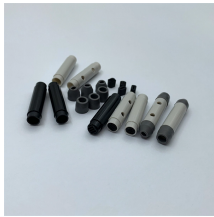

PXK series positive pressure explosion-proof distribution cabinet explosion-proof analysis room
Item NO.: 335167

For power distribution of lighting or power lines, electrical equipment on/off control; also as a central signal processing system and central control system. Send email to us

We have tailored suitable explosion-proof product solutions for thousands of customers, with professional engineers providing non-standard designs according to different industry needs.

It is a composite explosion-proof system with integrated positive pressure, intrinsic safety and explosion-proof technology. It has advanced structure, simple operation, safety and reliability.

Kaiwei products have passed ATEX, CCC, CE, INGRESS PROTECTION, factory explosion-proof certification and ISO9001-2000 international quality system ...

4. There are box style, musical plate style and board style, the board style are divided into fluctuated structure and right and left structure.

Equipped with a gas pressure regulating and filtering device, users only need to introduce the on-site industrial gas source, without the need to install other gas source components;
