Overview

This document summarizes the key components and purpose of a fiber optic project's as-built drawing. The as-built drawing contains information on the actual implemented fiber route, including manhole locations, distances, terrain details, site coordinates, and landmarks. In a Fiber Project drawing documents are taken serious. Within 2 weeks of installing utilities, contractor shall submit to Rutgers Utilities for review, utility drawings with utility-specific information as indicated below. The As-Built. The installation of fiber optic infrastructure requires detailed fiber optic route survey drawings that describe the type of communication systems required, the geographic layout, the transmission equipment to be used, and the required fiber optics network, as well as terrain details, obstacles. Our expert OSP Network Designers in FTTH, FTTx designs and standards enables us to provide top quality services to EPC companies all over the world. For New Network builds, we have experience ranging from Single and Multi-dwelling Units, Commercial Units FTTH Fibre-to-the-Home networks, Outside. ation revisions that were implemented during construction. As-Built Plans must be legible, in an acceptable file format, meet minimum resolution criteria, meet all display attribute standards (e.
