

## Fiber optic router automatically changes

### Overview

Fiber can improve the connection coming into your home, but it can't automatically fix what happens after that signal reaches your router, your Wi-Fi, or, ultimately, whichever devices you want to use. I just replaced my fios router with a TP-Link AX 1500 (ver1. I also set the DHCP range from 192. Everything was working fine. If that does not fix the problem, then you may have to work out how to get the two routers to play nicely together. If it is anything like my ISP supplied gateway modem/router, your device will have an option to put the MR80 into its "DMZ". Think you know your routers from your repeaters — put your home networking know-how to the. Seamless roaming: Devices automatically switch between the 2.
