

High-density hot-swappable power distribution units rack-mounted in stock

High-density hot-swappable power distribution units rack-mounted

Compatibility with all industry-standard racks and power chain Available in all major global voltage and amperage combinations typically used in data centers or remote sites.

Providing reliable and cost effective power distribution, the Basic PDU offers IEC outlet grips, tool-less installation in server racks, color-coded outlet sections and a high operating temperature.

Our in-cabinet-mounted Power Distribution Units (PDUs) are manufactured from high-quality components to support all your mission-critical applications. Belden PDUs are designed to facilitate ...

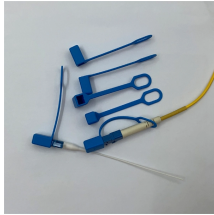

Custom load-specific distribution blueprints designed for maximum power density and thermal stability across your whitespace. Built in our state-of-the-art US facility using premium components from ...

Take energy management to the next level with Panduit PDUs. Designed to protect both on-premises and remote environments, our PDUs not only optimize power consumption but also guarantee ...

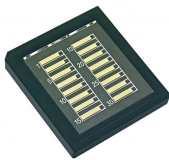

Created with data center design in mind, the Eaton High Density (HD) rack power distribution unit (PDU) builds off the best-in-class Eaton ePDU G3 technology. High density means more outlets in the same ...

The PX4 is more than just a rack power distribution unit. It is a unified rack PDU solution that provides forward-thinking tools, sensors, and insights to solve ever-evolving infrastructure challenges.

Reliable rack-level power distribution designed for data centers, network closets, and high-density IT environments requiring flexible deployment and broad UPS compatibility.

Metered-by-outlet Rack Power Distribution Units (Rack PDU) with Switching provide real-time energy management and on/off control at the outlet level to provide advanced data center energy management.

The units are available in horizontal 19-in. rack or vertical mounting capabilities and a broad range of characteristics. The PDU provides efficient and reliable power distribution capabilities, ensuring ...
