

How to block the opening of a cable tray

Overview

The use of nonmechanical systems of material--putties, caulk and foam--that are capable of fitting around or in irregular cables and pipes to seal off openings is more common. We recommend the use of a material that can be removed in case you eventually need to run more cable through. This product will intumesce and lock tightly into place eliminating the prep work of cutting or leaving any messy debris. The resulting barrier retards the transmission of smoke, fire, and toxic gases from spreading between adjacent rooms and floors for the rated time period. Check out our products available in your country: more This video shows you how to install Hilti. HOW TO: Install Hilti CFS-BL firestop blocks for cable tray pe. In other words, the cable tray manufacturer did not go to UL or ETL and say "test this tray penetration for 2 hours, make the hole this size, and use these pillows, compressed this.
