How to connect a TP-Link router to fiber optic internet

Overview

In this tutorial, we'll guide you step-by-step through simple and effective configuration of your TP Link fiber optic router. Setting up your TP-Link router for fiber optics may seem like a daunting task, but with the right steps, it can be quite. In this guide, we'll walk you through how to connect a fiber optic cable to a router safely and efficiently. Why Use Fiber Optic Internet?

Before diving into the setup, let's quickly recap why fiber optics are worth the effort: Lightning-fast speeds (up to 1 Gbps or higher). In this article, we'll show you how to set up. When you sign up for CenturyLink's fiber internet service (FTTH), they'll install an optical network terminal (ONT) somewhere in your house that converts the fiber optical into an ethernet cable. It's not always as simple as plugging a new router directly into the wall. The fiber. Currently I can get the X75 to produce Wi-Fi just fine, but it has to be connected to my ISP's provided modem/router which is receiving internet itself via the previously mentioned ONT connected wall port.
