

# How to connect the fiber optic core of a ring array

## Overview

Connect the peripheral optical fiber cable to the ATB, splice the optical fiber cable and the optical jumper, and then wind the spliced cable around the fiber spool on the ATB. Only professionals are allowed to splice fibers. This guide walks you through everything you need to know about fiber ring networks—from basic concepts to topology diagrams and essential protocols. What Is a Fiber Optic Ring Network?

A fiber optic ring network is a physical or logical network topology where devices (usually switches) are. The optical jumpers between the fiber adapter and the SmartLogger and between the fiber adapter and the opto-electronic Ethernet switch (SWITCH03) are preinstalled before delivery. Insert optical modules into the SFP1 and SFP2.
