

# How to disable AI server notifications

## Overview

To disable just the AI notification tools: Open Settings > Notifications > Prioritize Notifications > Switch the toggle off. For those who want to sit out the AI storm and avoid these half-baked, rushed-to-market neural network assistants, we've put together a quick guide on how to kill the AI in popular apps and services. Get what you need to know when it comes to tech and gadgets. Apple has a suite of AI. The AI assistant triggers pop-ups from the taskbar, browser sidebar, and productivity apps, creating constant distractions when you need focus. You will disable the taskbar shortcut, adjust. Turning it off, though, is refreshingly straightforward thanks to system-level controls. Right-click on the Copilot icon. The shortcut will be immediately removed. But removing the symptom is just the start; deeper settings within the Copilot app allow more customized. Learn how to turn off new event notifications in Discord. more Audio tracks for some languages were automatically generated.
