The collimator tube must be aligned so that the input beam is level and straight in the splitter box. If this is not aligned properly, excessive losses will occur when the laser is coupled into the fiber.

You are now ready to install your splitter without having to hole the top nuts with a ...

Designed to fit within the inner diameter of 25mm and 30mm standard cage system plates, TECHSPEC® Cage System Fixed Optical Mounts are ideal for mounting beamsplitters and ...

Have any questions? Talk with us directly using LiveChat.

To rotate the beam splitter about the horizontal axis, loosen Screw A, adjust the bracket by hand until the beam is aligned with the target, and then tighten Screw A.

Beamsplitters are optical components used to split incident light at a designated ratio into two separate beams. Additionally, beamsplitters can be used in reverse to combine two different beams into a ...

Cube beamsplitter holders allow cube beamsplitters to be mounted to a standard mirror mount. They have a clear aperture to allow a transmissive beam to pass through the mount.

Wondering if you need a beam splitter for your microscope or slit lamp? Here's how to install one and what benefits it can offer.

Place the engine on the engine mounting platform with the recoil cover facing outward towards the wheel and align the 4 holes on the engine base with the holes in the engine platform.

Here are the install DIY for our Quick-Release Adjustable Front Splitter Brackets and Front Race Splitter. You're going to need to jack up the car ...
