

How to order and install cable tray elbows with diagram

Overview

Learn how to install cable trays for large-scale projects with our professional, step-by-step guide covering industry standards, safety protocols, and efficient routing techniques. Snap Track offers numerous fittings to make the system easy to install. The Snap Track system was designed and is intended to be used as a UL Classified continuous assembly of straight sections, fittings, and accessories used to form a structural support, for the purpose of supporting, protecting. The aluminum I-beam design of ITray is perfect for industrial installations with large diameter cables in long span situations, minimizing total tray width and creating a smooth transition between straight sections and fittings. Users can achieve design flexibility with numerous sizes of horizontal and vertical elbows, adjustable elbows, cross pieces, tees, reducers, and branches. Whether you're building a commercial setup or upgrading an industrial plant, proper cable tray installation ensures neat wiring, safe access, and easy maintenance. But before you lay the first tray or clamp down a single cable.
