

## How to restore an eye transducer to factory settings

## How to restore an eye transducer to factory settings

What seems to be happening is that the display isn't recognizing the transducer. We can prompt the display to search for the transducer again. It should do this automatically, but it doesn't always work ...

In this short video, Marc Marcantonio demonstrates how to perform a hard reset, and explains when and why it is important.

Allows you to set manual transducer configuration parameters on a compatible sonar module. See the installation instructions for your compatible sonar module for more details on connecting and ...

Sometimes, a simple restart can resolve minor glitches. Next, inspect the fuse. A blown fuse can prevent the device from powering up. Replace it with a new one if necessary. Also, examine ...

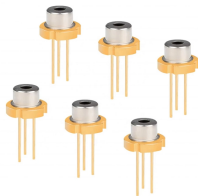

My guess is you've probably already tried it, but to bring the brightness back up you just press the power button. Don't press and hold, just a short press. That's how you cycle through the ...

Transducer type is used for selecting the transducer model connected to the sonar module. The transducer selected will determine what frequencies the user can select during sonar operation.

Install the transducer in a location that provides an unobstructed view of the water, typically on the transom or trolling motor. Use the twist-lock connectors for a secure and waterproof connection to ...

This document describes the basic controls of the Lowrance Eagle Eye™ multi-function display (MFD). For the latest version of this document and the full operator manual, visit: ...

Note: A factory reset reverts the device back to factory settings. It will permanently erase all personal data, preferences, settings and content such as pictures, ringtones and apps that are saved to the ...
