This article systematically analyzes the working mechanism of TRIAC dimming, driver selection, pros and cons, common issues and solutions, and compares it with other mainstream dimming methods. It aims to help you make more appropriate technical decisions for your projects. What is a TRIAC?

TRIAC. A TRIAC dimmer is a type of phase cut dimmer that controls how bright your lights are by “chopping” the AC power going to the lamp. It saves energy, provides ambiance, and extends the life of lighting fixtures. In this article, I will answer this question in depth. Also, I will examine. However, the terminology surrounding LED dimming—0-10V, TRIAC, ELV, PWM, DALI—can be a significant source of confusion for homeowners, electricians, and project managers alike.
