

# IPad Control of Distribution Box

## Overview

In this guide, we'll explore how IT teams can take full control of corporate iPads using Apple MDM solutions, what features define modern iPad management software, and how to ensure security, scalability, and compliance across mobile fleets. What is iPad Remote Management?

Intune supports mobile device management (MDM) of iPads and iPhones to give users secure access to work email, data, and apps. Before you begin, complete these prerequisites to. iPhone and iPad, combined with iOS and iPadOS, enable employees to get their best work done from anywhere. And they allow IT departments to spend less time managing devices — empowering them to shape business strategy and focus on needs beyond fixing technology and cutting costs. With over-the-air updates and remote troubleshooting. They are point-of-sale terminals, remote field tools, educational devices, and productivity hubs. But managing iPads at scale—especially outside the corporate network—poses serious challenges. The device is structured around several integral sections, each serving a unique purpose in the device's performance and user experience. Key areas

include the display, logic board.
