

Intelligent Cold Aisle Low-Noise Alternative Solution

Overview

The APC Thermal Containment for Hot/Cold Aisles, by Schneider Electric, is an intelligent thermal containment solution designed to increase cooling system efficiency while protecting critical IT equipment and personnel. Vertiv™'s Data Center Users' Group survey respondents ranked energy efficiency their second highest concern in spring 2009. In fall 2005, it was not even among the top five. Whether driven by a mandate to save costs, reduce carbon footprint or both, efforts to reduce data center energy consumption. In addition to our full range of integrated solutions, we offer cost effective OEM / ODM services to cater for new challenges and technologies rapidly emerging from customers' applications in different industry sectors. A primary advantage of cold aisle containment is that by focusing on the cold air, or the.

Intelligent Cold Aisle Low-Noise Alternative Solution

Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

Depending on your facility's layout, Armstrong Aisle Containment Solutions offer both Hot Aisle Containment (HAC) and Cold Aisle Containment (CAC) systems to suit new builds or retrofit ...

Complete cold aisle containment guide for data centers. Learn CAC benefits, implementation steps, and achieve 35% cooling cost reduction.

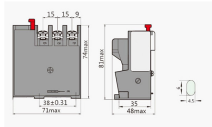

A comprehensive efficiency management platform that combines cold aisle containment with intelligent environmental controls can deliver greater than 30 percent energy savings and 25 percent capacity ...

The APC Thermal Containment for Hot/Cold Aisles, by Schneider Electric, is an intelligent thermal containment solution designed to increase cooling system efficiency while protecting critical IT ...

In addition to energy savings and improved operational efficiency, cold aisle containment can also improve aesthetics and reduce noise outside and around the data center. Karis offers several options ...

The Elevate cold aisle monitoring display screen is a state-of-the-art touch screen interface designed for comprehensive monitoring and management of cold aisle environments in data centres.

To reduce energy costs and noise in the data center, you must isolate the hot and cold airflow through each rack and the entire room. Austin Hughes's latest innovation in Cold Aisle Containment has ...

Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks are installed to simplify installation and speed deployment of new ...

This solution captures many requirements typically placed on the building shell and places it closer to the equipment. This includes busway, conveyance, docking, and other ancillary items.
