

Is the electrical cable tray trough type or ladder type

Overview

The ladder-type cable tray is designed with two long side rails that are connected by evenly spaced rungs, resembling a ladder. This structure is especially useful for supporting heavy-duty cables over long distances. Each cable tray type performs a different function and comes in various materials such as aluminum. The cable tray types to choose from are ladder, ventilated trough, or solid bottom. What are the reasons for selecting a specific type of cable tray?

The engineer or designer should select the type of cable tray that has the features which best serve the project's requirements. Allows cables to be secured with ties.

Is the electrical cable tray trough type or ladder type
