

Israel needs fiber optic cables

Overview

Bezek is expected to connect 80% of Israeli households to high speed Internet infrastructure, in small localities and in large cities; in the social and geographical periphery and in the center of the country; amongst the Arab and Jewish population; within the Green Line and in Judea. Bezek is expected to connect 80% of Israeli households to high speed Internet infrastructure, in small localities and in large cities; in the social and geographical periphery and in the center of the country; amongst the Arab and Jewish population; within the Green Line and in Judea. Following Bezek's announcement of the planned deployment of fiber optic infrastructure in 80% of households in Israel, the Ministry of Communications is promoting the deployment of fiber optic infrastructure in areas lacking economic viability and is publishing a clarion call for subsidized. Tel Aviv, November 24 (ANI/TPS): The inter-ministerial tender committee led by the Ministry of Communications decided on a quick mechanism for transferring payments from the incentive fund to companies operating in the combat zones and in the rest of the country as part of the first.

Israel needs fiber optic cables

In a bold move to enhance regional connectivity, Israel has unveiled plans to construct a remarkable 254-kilometre (158-mile) fibre-optic cable spanning from the Mediterranean to the Red Sea.

The Ministry of Communications has set a goal to achieve 45% of homes connected to fiber optic by the end of 2021 and 85% connected to fiber optic by 2025.

Eighty-three percent of Israeli households nationwide now have access to fiber-optic cables, with the ministry aiming to offer such accessibility to all homes by 2027.

Already this year, in areas where fiber-optic alternatives exist, companies will no longer be required to connect new subscribers using copper or ...

Israel's prime minister is floating the idea of building infrastructure projects such as a fiber optic cable linking countries in Asia and the Arabian Peninsula with Europe through Israel and Cyprus.

So far, about 2.4 million households in Israel have had access to fiber-optic cables. (ANI/TPS)
