

JDBC Distribution Box

Overview

0 - The JDBCStore is a distributed cache store backed by JDBC databases, enabling cache sharing across multiple BoxLang instances. Perfect for horizontal scaling scenarios where multiple application servers need to share cached data in load-balanced or clustered. New in BoxLang 1. CData Drivers now work with AI Coding tools The Box JDBC Driver enables users to connect with live Box data, directly from any applications that support JDBC connectivity. Rapidly create and deploy powerful Java. JDBC is an API that helps applications to communicate with databases. The Java Database Connectivity (JDBC) API provides universal data access from the Java programming language. We provide a “template” as a high-level abstraction for storing and querying aggregates.

JDBC Distribution Box

The Box JDBC Driver enables users to connect with live Box data, directly from any applications that support JDBC connectivity. Rapidly create and deploy powerful Java applications that integrate with ...

The Java Database Connectivity (JDBC) API provides universal data access from the Java programming language. Using the JDBC API, you can access virtually any data source, from ...

This page lists JDBC driver, UCP and other necessary jar files for various supported versions of Oracle Database.

The Java DB database is Sun's supported distribution of Apache Derby. Java DB is a fully transactional, secure, standards-based database server, written entirely in Java, and fully supports SQL, JDBC ...

New in BoxLang 1.7.0 - The JDBCStore is a distributed cache store backed by JDBC databases, enabling cache sharing across multiple BoxLang instances. Perfect for horizontal scaling ...

JDBC stands for Java Database Connectivity, which is a standard Java API for database-independent connectivity between the Java programming language and a wide range of databases.

JDBC (Java Database Connectivity) is a standard Java API that allows Java applications to connect to relational databases. It provides a set of interfaces and classes to send SQL queries, ...

Spring Data JDBC Distribution Distribution build for Spring Data JDBC Overview Versions (234) Used By Badges Books (34) License Apache 2.0

JDBC is an API that helps applications to communicate with databases. It allows Java programs to connect to a database, run queries, retrieve and manipulate data.

The Spring Data JDBC project applies core Spring concepts to the development of solutions that use JDBC databases aligned with Domain-driven design principles. We provide a ...
