

Lbqj10030 Bridge Erection Machine

Lbj10030 Bridge Erection Machine

Bridge Girder Erection Machine is a steel structure equipment for prefabricated beams moving and erecting for viaduct construction. This product is also suitable for the road beam projects in the ...

Customized Beam Launcher for bridges with span ranging from 20m to 70m. Beam feeding from rear end of the Beam Launcher on the deck level or ...

Discover bridge girder erection machines for road construction, ideal for girder and box girder bridges. CE certified, 80-900 ton capacity.

Also provides a detailed product description of the Bridge Erection Machine, including product introduction, history, purpose, principle, characteristics, types, usage and purchase precautions, etc.

Customized Beam Launcher for bridges with span ranging from 20m to 70m. Beam feeding from rear end of the Beam Launcher on the deck level or from below on ground level or from bridge ...

Designed to lift, align, and place precast bridge girders or segments with precision, it plays a vital role in ensuring project speed, safety, and structural accuracy.

It features high load capacity, precise operation, and strong structural performance, making it ideal for lifting and installing precast bridge girders. The system includes a main beam, front and rear support ...

This is what came from : A bridge needs to be built, so time to bust out the cranes, right? Not so fast, a Chinese company has built a machine that has a creative way of setting girders into place.

Capable of lifting long-span, large-tonnage girders, with capacities often exceeding 900 tons. Advanced control systems ensure millimeter-level accuracy during girder alignment and placement. Suitable for ...

Highway bridge erecting machine is an indispensable professional bridge erecting lifting equipment in highway construction. It is applied to the laying of roads and bridges.

Its core function is to lift precast girders (such as T-girders and box girders) from transport vehicles and place them on piers or abutments to complete the assembly of the bridge's main structure. It is ...
