

National Standard for Cable Trays 2019

Overview

This Standards publication for Ampacities of Cables Installed in Cable Trays (ICEA P-54-440, NEMA WC 51-2019) was developed by the Insulated Cable Engineers Association, Inc. This standard specifies the requirements for nonmetallic cable trays and associated fittings designed for use in accordance with the rules of the Canadian Electrical Code (CEC) Part 1, and the National Electrical Code® (NEC). No technical changes have been made jointly. However, the revision pages dated September 9, 2019 will not be jointly issued by UL and CSA as these revision pages address UL ANSI approval reserved. All rights including translation into other languages, reserved under the Universal Copyright Convention, the Berne Convention for the Protection of Literary and Artistic Works, and the International Convention for the Protection of the Intellectual Property of the document at the time it was developed.
