

National Standard for Galvanizing Process of Cable Trays

Overview

Process: Deposits a layer of zinc onto the steel surface through electrolysis.

Primary Standard: Specified in GB/T 26941. 1-2011 "Cable Trays - Part 1: General. It is the first joint effort of NEMA and CSA International to put in one place standards for metal trays per both NEMA and CSA methods. Information on maintenance and system modification is also. NEMA Standards Publication 1 (0\$9 (6WDQGDUGIRU0HWDO&DEOH 7UD6VWHPV National Electrical Manufacturers Association NEMA Standards Publication VE 1-2017 CSA Group Publication CSA C22. Characteristics: The zinc layer is thin, bright, and. , is a welded wire-mesh cable management system made of high-strength steel wire.

NEMA Standard VE 2-2006 addresses shipping, handling, storing, and installing cable tray systems; it also provides information on cable tray maintenance and system modification.

Specifies requirements for metal cable trays and associated fittings designed for use in accordance with the rules of Canadian Electrical Code, Part I and the National Electrical Code®

NEMA VE 1-2017 standard for metal cable tray systems. Covers construction, materials, dimensions, load capacity, and testing.

NEMA VE 2 addresses shipping, handling, storing, and installing cable tray systems and provides information on maintenance and system modification. **WARNING!** Do not use a cable tray as a ...

There are many national standards for cable tray, and the technical specification of T/CECS 31-2017 steel cable tray is the latest standard, in which different galvanizing processes and corresponding ...
