

New Industrial Switches

New Industrial Switches

Whether you're managing a factory floor, an energy grid, or any other demanding setting, industrial network switches provide the durability and performance needed to keep operations running ...

Whether you're upgrading your facility's electrical infrastructure or ensuring the highest standards of safety and efficiency, our top-quality switches provide reliable performance and ease of use. Explore ...

Unmanaged and managed switches in various designs are available to enhance performance and security. These robust switches are designed for industrial use and are fully compliant with IEEE ...

Built to endure the demanding conditions of factories, transportation infrastructure, grid substations, and other harsh environments, Cisco Industrial Ethernet switches come in a wide range of form factors to ...

The new FL SWITCH 5900 series offers high data performance, comprehensive security functions, and modern TSN mechanisms. The managed switches in 19" format with flexible port options are the ...

Length:14.5mm
 Small-end inner diameter:2.0mm
 Large-end inner diameter:3.5mm
 Outer diameter:5.2mm

We have been designing industrial hardware for Modbus and PROFINET to ethernet conversion for over 40 years. This expertise has been used to design the toughest Ethernet switches on the market.

With their strong build, the whole family of DIS industrial switches are certified against vibration, shock and free-fall. We're so confident in the quality of their hardened build that they come with our D-Link ...

Ruijie offers next-generation industrial Ethernet switches designed for harsh industrial environments, providing flexible full-gigabit access as well as 10GE uplink ports, and supporting a wide operating ...

Extreme Industrial Switches are a family of ruggedized Layer 2 switches designed to operate under harsh environments and extended temperature conditions. They provide continuous uptime, ...
