

Palestin power distribution box renovation

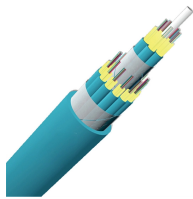

Overview

The project's main objective is to help address the needs of the energy sector in the Gaza Strip by improving and rehabilitating the electricity networks by targeting three main areas namely East Gaza, Beit Hanoun, and Khan Younis. Each solution focuses on safety, durability, and flexibility — ensuring fast deployment even in disaster-stricken areas. Time is critical in. Electricity peak demand is expected to increase from 1,200 MW as of 2016 up to 2,000 MW by 2020, entailing an annual compounded growth rate of 11%. Currently, the Palestinian electricity sector suffers the highly adverse impact of infrastructure under-investment to meet its current & forecasted. Over the past 14 years, the legislative, regulatory, and institutional pillars of the electricity sector in Palestine have witnessed an extensive restructuring process until 2009, when the General Electricity Law in Palestine was enacted. Accordingly, the main actors in the Palestinian electricity. The Palestinian Electricity Transmission Company (PETL) is the first national governmental company to supervise the construction and operation of a national transmission system for electric power, as it represents the only entity authorized to purchase electric power and to transfer it to the.
