Home / All Products / Cabinets, Thermal Management, Racks and Enclosures / Aisle Containment

Aisle containment in the data center requires that cabinets are aligned in a hot aisle/cold aisle layout. Containment panels or strips create a partition to isolate either the server supply air (cold aisle ...

Vertically integrated manufacturer of hot aisle containment, cold aisle containment, white space structure and conveyance solutions.

Ceilings span the gap across the top of cabinets in cold aisle containment. They keep cold and hot air from mixing and are available in several styles to best suit your application.

By isolating the cold aisle, containment reduces unintended mixing of cold supply air with hot exhaust air, maintaining uniform, predictable temperatures across all racks.

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system. ...

Eaton's SmartRack Aisle Containment System is an easy-to-assemble structure designed to keep hot and cool air separated for better temperature control and ...
