

## Pigtail tied too tightly

### Overview

Wearing tight ponytails can cause breakage when you let your hair down. We've all noticed strands stuck to hair ties, which can be frustrating. Hair is 95% keratin—a fibrous protein that's also found in your nails and skin. It is found both in the cuticle of. Tying your hair too tightly, particularly on a consistent basis, can lead to a range of unwelcome consequences, from headaches and discomfort to traction alopecia, a potentially irreversible form of hair loss. Understanding the mechanisms behind these effects is crucial for maintaining hair health. Most people tie their hair without a second thought, never realizing it could be damaging. Securing your hair is often necessary, whether you're working, exercising, or enduring a hot day. What is Traction Alopecia?

## Pigtail tied too tightly

Ponytails and other tight, tied-up hairstyles can cause a form of hair loss that's referred to as traction alopecia. Unlike pattern hair loss, hair loss caused by traction alopecia typically isn't ...
