

Pipeline and Cable Tray Construction in Ecuador

Overview

Find Ongoing Construction Industry Projects in Ecuador Region with Ease. With Blackridge Research's Global Project Tracking (GPT) platform, you can identify the right opportunities and grow your pipeline while saving precious time and money. Located in the Morona Santiago province, Warintza is a large-scale copper-molybdenum porphyry operated by Canadian miner Solaris Resources. The newly released pre-feasibility study reinforces the project's significance, confirming it as one of the most attractive undeveloped copper assets globally. The project involved production facilities and an export pipeline for 30,000 bpd crude oil development. Your browser is not compatible with Google Maps v3. The pipeline traverses three natural regions of the country: Amazon, Sierra and.
