

Price of 35kV Double Busbar Cabinet

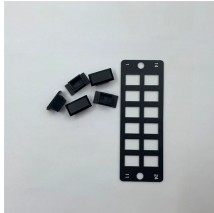

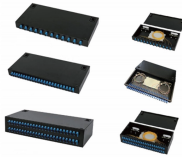

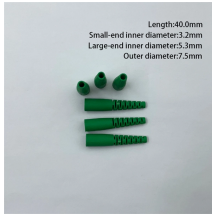

Overview

The Larson Electronics MT-SC-2W-35KV-600A-N3R Three-Phase 2-Way Sectionalizing Cabinet provides protection and storage for equipment in industrial work areas. Constructed of coated steel with a UV-stabilized gel coating for durability, the unit can be installed on surfaces. Heavy-Duty channelized construction; Standard cabinet is fabricated from 14 gauge galvaneel steel; Also available in stainless steel or aluminum (contact rep); Heavy duty wind locks are standard on all models; Custom sizes and special junction mounting brackets available; Stainless steel hinge barrels. Hubbell's Sectionalizing Cabinets and Secondary Pedestals are not only strong, durable and easy to install, they also emphasize security and convenience. Made from fiberglass, metals, or plastics, they are designed to meet the most rigorous industry standards. A Cobra Lock™ option can be added for. Provides an extremely compact, versatile solution for loop, tap, grounding, testing or sectionalizing applications through 35kV, 900A. Padmount, vault and subsurface designs are available. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due

to custom. Route electricity within switchboards and battery banks; also known as bus bars In cabinets and other tight spaces, ground multiple wires at one convenient spot Create a convenient central grounding point by connecting multiple ground wires Our most conductive metal for electrical applications—all. ain busbar connector box used in electrical equipment for insulation protection at connection points. This product ensures that high and low voltage switchgear circuit breakers remain undeformed, even under extreme heat.

The Larson Electronics MT-SC-2W-35KV-600A-N3R Three-Phase 2-Way Sectionalizing Cabinet provides protection and storage for equipment in industrial work areas. Constructed of coated steel ...

Hubbell's metal sectionalizing cabinets provide a low-cost, safe, aesthetically pleasing means of providing a sectionalizing and tap point for underground distribution systems.

Provides a safe and convenient primary cable terminating, sectionalizing, tapping, and switching point for underground distribution systems.

Various model's mounting plates accommodate a variety of 15/25/35 kV, 200-600A junctions. The cabinets four eye-bolts allow the line-person to simply hook-up the cabinet, position it over the ...
