

Price of Intelligent Coarse Wavelength Division Multiplexer for Broadcasting in Morocco

Overview

Two types are available: integrated arrayed waveguide gratings (AWG), offering low cost, compact size, and precise ITU grid alignment; and discrete filter-based WDMs, providing greater flexibility to accommodate a wide range of wavelengths and fiber types. Some GBIC and small form factor pluggable (SFP) transceivers utilize standardized CWDM wavelengths. GBIC and SFP CWDM optics allow a legacy switch system to be “converted” to enable wavelength multiplexed transport over a fiber by selecting compatible transceiver wavelengths for use with an. The Coarse Wavelength Division Multiplexer (CWDM) series by GKER Photonics Co., Ltd is engineered to meet Telcordia standards, incorporating advanced thin film filter technology and state-of-the-art packaging techniques. CWDM technology uses ITU standard 20nm spacing between the wavelengths, from 1270nm to 1610nm. Our CWDM module has 4 to 18 channels. The central wavelength of each channel is specified to one. As specialists in WDM multiplexing, Pro Optix offer four different series of WDM multiplexers to our customers, depending on

performance and density requirements, so please liaise with the Pro Optix team to qualify what meets your needs most effectively.
