FS fiber optic pigtails offer a fast way to make fiber optic communication devices in the field by fiber splicing, fully manufactured and tested by industrial standards.

I usually bill T& M, but it works out to about \$175-250 for setup/teardown per site and \$4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it's flooded or dry cable.

The cost of splicing fiber optic cables can vary significantly based on several factors, including the type of splice, the equipment used, the location of the job, and the expertise required.
