

Primary wiring cabinet

Primary wiring cabinet

Our primary pedestals provide a convenient means for single-phase sectionalizing or temporary cable cover for 200A underground distribution systems rated 15 or 25kV class.

All new primary metering enclosure installations shall be wired per the diagram below. If an existing (old) enclosure needs maintenance where an outage is required, it shall be rewired at that time.

PG& E will provide the metering bracket, pre-wire the CT and VT secondary connections, and will deliver to the site for the customer's installer to mount on the pole and make the primary connections.

Junction bars and sectionalizing cabinets provide an extremely compact, versatile solution for loop, tap, grounding, testing or sectionalizing applications through 35kV, 900A.

Eaton Cooper Power series SecTER sectionalizing cabinet, Yes, Three-phase, ANSI 70 Gray, Stainless steel, 30", 84", 22", Flat, Junction type: 15 kV, 4-way 200A junctions w/ U-straps, Ground rod installed

We provide primary metering equipment in both pad mounted and switchgear-style designs that meet the stringent and unique requirements of the electric utility company in your area.

The top-hinged, diagonally-cut, removable cover and cabinet are designed for easy, one man opening. Recessed door and low sill provides improved access to interior terminations.

Its larger 79" width provides the necessary flexibility for both radial and loop-style feeds, making it the standard choice for utility customers looking for a reliable, highly adaptable primary metering solution ...

Select the right electrical enclosure for your environment and the accessories you'll need to get it mounted and connected. Choose from our selection of electrical cabinets, including over 2,600 ...
