Let Metro Communications design and implement a custom fiber network for your business or service. Increase security, allow for easier scalability at a price you can afford.

Unlike cable connections, which rely on coaxial cables, private fiber networks transmit data at the speed of light, facilitating the seamless transfer of large volumes of information.

Unite Private Networks (UPN) provides fiber-optic communications infrastructure services to schools, governments, carriers, data centers, hospitals, and enterprise business customers.

We deliver optical connectivity solutions for every segment of the network, including carriers, data centers, in-building networks, and original equipment manufacturers (OEM).

Make our fiber-optic network work for your business. Literally. With our Private LAN/WAN service, we can connect multiple offices together over our network. With this service, your offices will feel like ...

A self-built fiber optic cabling infrastructure can dramatically lower capital expenditures and operating expenses. If you're an IT leader considering building a private network, follow these steps:

Lightpath Private Network Solutions have been designed to offer private, dedicated fiber for your networking needs.
