

Relay protection circuit installation price

Overview

Labor costs commonly range from \$50 to \$450 per job for relay installs, depending on complexity. This article provides practical price ranges to help estimate a mid-range project budget for U. Buyers typically pay a range for relays, and cost is driven by relay type, coil voltage, contact rating, and packaging. Assumptions: region, specs, labor hours. In general, a basic PCB relay may cost \$1-\$5 per unit when bought in small quantities, while higher-end industrial relays with protection features can run \$50-\$200 each. For a small project (1-10 relays) expect \$10-\$250 including basic wiring.

Assumptions: region. Eaton's protective relays provide you with unique microprocessor-based devices that eliminate unnecessary trips, mitigate arc faults, protect motors and breakers, and provide system information to help you better manage your system. Our predictive diagnostic solutions include non-destructive testing. Facilities need to perform installation tests, implement preventive maintenance programs, and perform comprehensive commissioning tests to verify the integrity of both existing protective relay systems and new protection systems. The recommendations and guidelines in this document are based on the.
