

## Rwanda DAC High-Speed Cable 1 6T

## Rwanda DAC High-Speed Cable 1 6T

It is suitable for high-speed interconnection scenarios between 1.6T switches and 800G SuperNICs. It provides cost-efficient connectivity for short-distance interconnects and enables higher port ...

All transceivers are rigorously tested for low BER and latency. Cable options include 1.6T OSFP224 DAC, ACC, and AEC (IHS & RHS), 1.6T to 2x800G OSFP224 DAC/ACC, and 1.6T to 4x400G ...

Lumulus Technologies has developed an innovative 1.6T DAC cable, designed to deliver exceptional performance in high-speed connections. The exponential growth of AI models has ...

1.6T direct-attached copper cables provide up to 1600Gbps aggregate throughput and can be applied in liquid cooling environments. Integrated with a heat sink and airflow channels, enhancing the cooling ...

As next-gen data centers deploy faster speed in a tighter space, they need high performance cables that reduce power consumption, provide reliable operation and are low cost. Volex's 1.6T OSFP-XD cable ...

The PHILISUN 1.6T OSFP (FIN) to OSFP (FIN) is a new-generation 8-channel high-speed cable supporting 1600 Gbps, optimized for 224 Gbps PAM4 and compliant with IEEE 802.3 standards ...

1.6T OSFP passive copper cable assembly feature sixteen differential copper pairs, providing eight data transmission channels at speeds up to 200Gbps per channel, and meets 1.6T ...

SUPPORTS  
DIN RAIL INSTALLATION

Maximize your data transfer speed and network reliability with our Custom 1.6T OSFP-XD DAC Cable, designed for both Ethernet and InfiniBand connections.

Direct attach copper cables designed for 200G, 400G, 800G, and 1.6T Ethernet links provide short range interconnect solutions for modern data center environments.

1.6T direct-attached copper cables provide up to 1600Gbps aggregate throughput and can be applied in liquid cooling environments. Integrated with a heat sink and airflow channels, enhancing the cooling ...
