

Server Room Power Distribution Box

Server Room Power Distribution Box

Power your data centre, server room, or network rack with precision, efficiency, and full control. Overview. At Data Room Direct, we supply high-quality Power Distribution Units (PDUs) designed for ...

Increasing rack power density both in the data center and at the network edge means that reliable power distribution is crucial. Our innovative power distribution units and rack PDUs not only maintain power, ...

When setting up your server room, the choice of rackmount power distribution units (PDUs) can greatly impact performance and safety. You might be overwhelmed by the options, but selecting ...

A Power Distribution Unit (PDU) is a specialized electrical device designed to distribute power from a single input source to multiple output receptacles, specifically engineered for data center and IT ...

Our Rack PDUs (power distribution units) deliver reliable power right where you need it, helping you to create a clutter-free server room by managing the power cables within your rack.

Power distribution units are essential for efficiently managing and distributing electrical power in server rooms, data centers, and a variety of commercial environments.

Perfect for data centers, server rooms, and IT setups, these high-quality PDUs ensure safe, organized, and efficient power management. Choose from trusted brands offering durable and customizable ...

Overall, cabinet PDUs provide a highly efficient and space-saving power distribution solution for server cabinets and enclosures in data centers, server rooms, and other IT environments.

Remote Power Panels (RPPs) distribute power directly to the IT server racks or cabinets. Usually, RPPs are installed in close proximity to the racks, and typically in the same white space.

Providing reliable and cost effective power distribution, the Basic PDU offers IEC outlet grips, tool-less installation in server racks, color-coded outlet sections and a high operating temperature.
