

Short circuit in Madagascar electrical distribution box

Overview

Mains electricity varies in voltage and AC frequency across the world. As shown in the adjacent map and in the table below, premises in most of the world receive a supply of between 220-240 (nominal) at an AC frequency of 50. North America is the biggest exception. With the notable exception of North America, premises around the world receive eith.

Short circuit in Madagascar electrical distribution box
