

Should core switches be stacked

Overview

Switch stacking has emerged as a powerful technique that not only simplifies network administration but also enhances overall efficiency. This approach offers benefits like centralized management, enhanced redundancy, and simplified scalability. To make the most out of switch stacking, it's. They have a core L2/L3 with 3 L3 Meraki switches stacked. Did a firmware upgrade on the switches and their L3 routing went down. After reboots they were able to get it back up.
