

Swiss Fire-Resistant Cable Trays

Swiss Fire-Resistant Cable Trays

The FireMaster® cable tray wrap system provides 30 minutes hydrocarbon fire protection to cable trays carrying control cable wiring. The FireMaster® cable tray wrap consists of FireMaster® Marine Plus ...

Sealed your operations with our Fire Rated Cable Trays, engineered to keep your electricity supply functional even in fire emergencies. Built to endure heavy loads without collapsing.

Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric cables where fire resistance is crucial - this includes cable basket tray systems for Prysmian FP ...

Meka Pro regularly tests the fire resistance of its products to ensure high-quality and safe cable management systems. The products are tested extensively and using several different installation ...

Cable trays are intended for the construction of fire-resistant cable paths with surface cable laying. Cable paths are constructed as standard or lightweight cable paths.

Since its founding, EAE has grown rapidly, expanding its production and areas of operation by incorporating EAE Lighting in 1983, EAE Machinery in 1996, EAE Electrotechnics in 2004, and EAE ...

We offer fire-rated trays with a height of 60 mm, which meet the strictest standards and ensure reliable protection of your cable distributions against fire. Our products are characterized by easy installation, ...

This innovative design not only provides excellent fire resistance, but also effectively addresses the common issues associated with traditional fully enclosed cable trunking systems, such as heat ...

Basor Electric, sensitive to the need to minimize the consequences of a fire, has subjected its cable trays to rigorous fire resistance tests to ensure the behavior of its products.

They are made of a steel frame coated with fire-resistant paint or composite fire-resistant panels. Under high temperatures, they form a heat-insulating char layer that prevents the spread of fire.
