

Uzbekistan to Fiber Optic Cable Route

Overview

Within the framework of the Trans-Caspian Fiber Optic Cable project, a 380 km long fiber-optic cable will be laid along the seabed of the Caspian Sea, connecting Sumgayit (Azerbaijan) and Aktau (Kazakhstan). The project is expected to be completed by the end of 2026. Kazakhstan and Uzbekistan are striving to reduce their digital dependence on Russia while shifting their economic focus more toward the West. According to Azeri-Press News Agency, this. The Trans-Caspian Fiber Optic Cable is a backbone fiber-optic cable between the Republic of Azerbaijan and the Central Asian Republics through the bottom of the Caspian Sea, being an Asian part of the mega Digital Silk Way project, and creating a digital telecommunications corridor between Europe. A marine route survey has been launched for the construction of the Trans-Caspian Fiber Optic Cable which is an essential element of the 'Digital Silk Way' project, aiming to create a new digital corridor between Europe and Asia.

Uzbekistan to Fiber Optic Cable Route

With a data transmission capacity of up to 400 terabits per second, the cable will form a high-speed, low-latency regional connectivity corridor. ...

Work has started on the marine survey for the construction of the Trans-Caspian fiber-optic cable line — a key element of the “Digital Silk Road” project aimed at creating a new digital corridor between ...

This research will enable the identification of the shortest, safest, and most environmentally sustainable route for the construction of this strategically important project. The ...

With a data transmission capacity of up to 400 terabits per second, the cable will form a high-speed, low-latency regional connectivity corridor. Construction is expected to be completed by ...

Central Asia's fiber rollout economics, particularly via the Trans-Caspian Fiber-Optic Cable, significantly reduces reliance on northern routes while linking Central Asia and Europe as part of the ...

Kazakhstan and Uzbekistan are striving to reduce their digital dependence on Russia and tilt their economic attention a bit more to the West. The two countries are moving forward with a plan ...

The first phase envisages the construction of a backbone fiber-optic cable on the Azerbaijan-Kazakhstan route through the bottom of the Caspian Sea, while the second includes the construction of a similar ...

The survey, which began simultaneously in Azerbaijan and Kazakhstan, is expected to take up to four weeks. As part of the Trans-Caspian Fiber Optic Cable project, a 380-kilometre fiber ...

The Trans-Caspian Cable Project, a strategically significant part of this initiative, involves the construction of a 380 km long fiber-optic cable line along the seabed of the Caspian Sea ...

The Trans-Caspian Cable Project, a strategically significant part of this initiative, involves the construction of a 380 km long fiber-optic cable line along ...

Kazakhstan and Uzbekistan are working to lessen their digital reliance on Russia while shifting their economic focus more toward the West. As part of this effort, the two countries are ...

This strategic project involves the construction of a 380 km-long fiber-optic cable line across the Caspian Sea, connecting Sumgayit (Azerbaijan) and Aktau (Kazakhstan). It will provide ...
