What patents are available for outdoor power distribution boxes

The power distribution box receives power from an external power source and distributes the power to a plurality of alternating current (AC) output receptacles.

A power distribution box is disclosed. The power distribution box may include a housing including one or more panels. The one or more panels may define a cavity. The power...

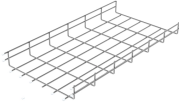

SOLUTION: A distribution box for outdoor use includes an outer shell, a distribution box is provided in the outer shell, a fiber layer is provided between the distribution box and the...

Search specific patents by importing a CSV or list of patent publication or application numbers.

A power distribution box is disclosed. The power distribution box includes one or more continuous-powered receptacles and a plurality of power-alternating receptacles.

Conventional power distribution systems typically include a number of different electrical components such as circuit breakers, input and out put connectors, indicator lights, etc.

Disclosed are a circuit breaker and a power distribution box. The circuit breaker comprises a housing, a control device, as well as a current signal acquisition mechanism, an operating mechanism, and a ...

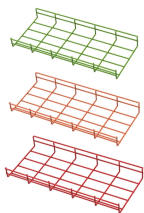

The power distribution box receives power from an external power source and distributes the power to a plurality of alternating current (AC) output receptacles.

Find existing patents, published patent applications, and other published patent documentation.

The invention discloses an outdoor power distribution box which includes an outer box, an inner box, an outer box door, an inner box door, a drying oven, a fan, a drying box, a connecting pipe, a cooling ...

As a key component in the power supply and distribution system, the circuit breaker can play a role in controlling a connection/disconnection of a circuit, and further has a specific protection ...
